## PERSONAL PROJECTS

**User management Application**

- It is an basic user management web application that manages the collection of users with some basic features like list, insert, update and delete.
- Tools and Technologies used : Eclipse IDE, Apache-tomcat server, JDK, JSP, servlet API, Mysql, JDBC.

**Electronic Stethoscope Application**

- It was one of my internship projects in which we had to develop an app that can record different audios from the patient's body.
- It was developed in association with a device known as a digital stethoscope which is kept on the patient's body part which doctor wants to listen the audio such as heart and the mobile application get connected to the device via Bluetooth, now audio gets recorded into the application and doctors can listen to that audio anywhere.

**Personal Portfolio**

- This is an static website which contains all the information about me , my skill and work.
- It is designed using HTML, CSS, JAVASCRIPT.
- Link to my portfolio website - https://shreyatiwari.netlify.app/ .

**Sherry's cafe (project undertaken)**

- This is an dynamic website which consist or different sections such as orders, menu , Readers section, contact.
